ABOUT ME

I'm a Systems Engineer and Full Stack Developer with a passion for building reliable end-to-end solutions — from responsive UIs to ETL processes and exploratory data analysis. I bring strong expertise in process analysis and automation, and I value clean architecture, continuous improvement, and shipping things that work.

Beyond web and data, I have a foundational understanding of networking and cloud platforms (AWS, Azure, GCP), and I'm exploring prompt engineering as AI becomes a bigger part of modern software development.

Guatemala, San Miguel Petapa

Agosto 19, 1994

HABILIDADES

Scrum and Agil • Business Intelligence • Data Analysis • Databases Admin • ETLs Development • Full Stack • RPA • Prompting Engineering • Basic ML Models

Leadership • Time Management • Effective Communication • Problem Solving • Teamwork • Emotional Intelligence

SOFTWARE

Excel

Power Query

Power BI

MySQL

SQL

Python

Pentaho

HTML
